

License Manager cleaning

- inside Mnova, open your LICENSE MANAGER (icon at the top right)

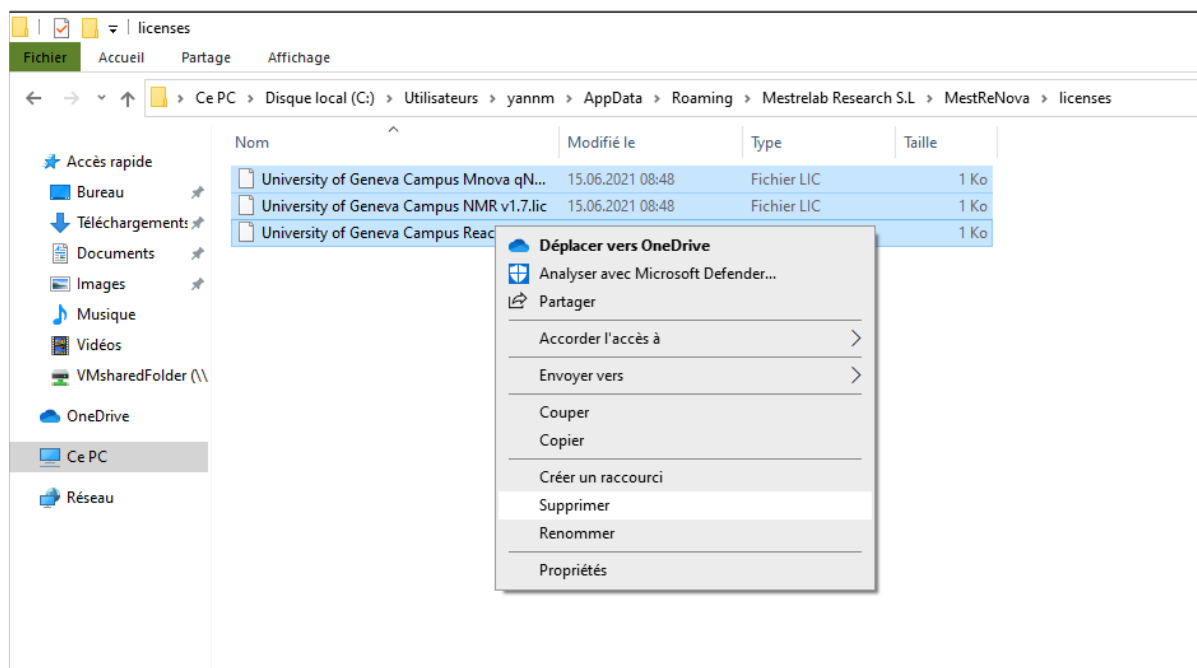

- check the "path" column of your License Manager window and **close Mnova**.

a. if your path starts with C:/Users/... (Windows) or /Users/... (MacOs)

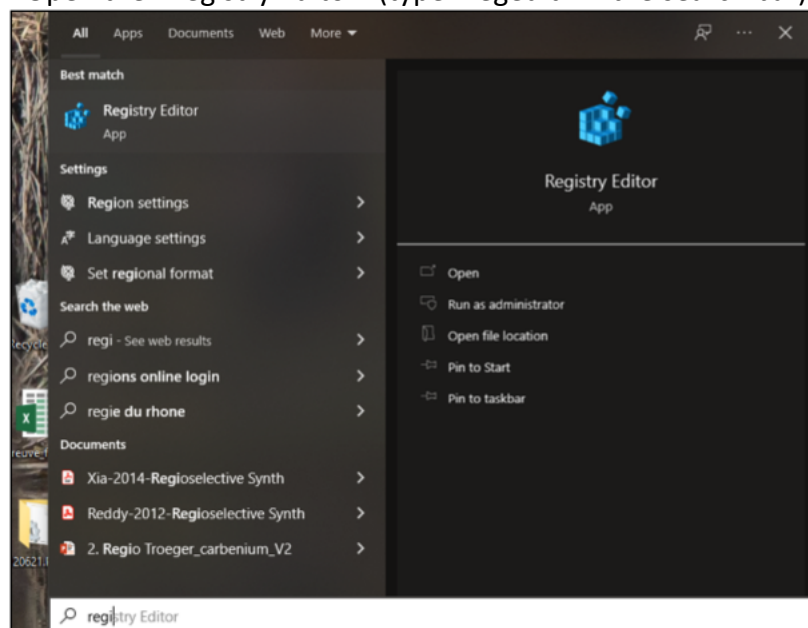

- Go inside the corresponding directory(ies) and delete all existing license files.

Note: the "AppData" folder could be hidden. In this case you need to tick the "Hidden items" option to make it appear.

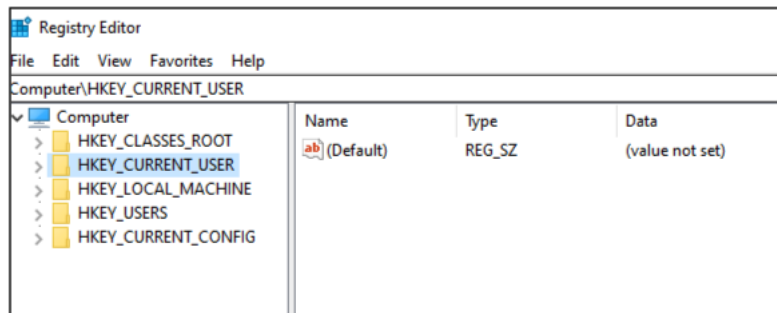

b. if your path starts with a server address: //10.194.51.22/licenses (Windows)

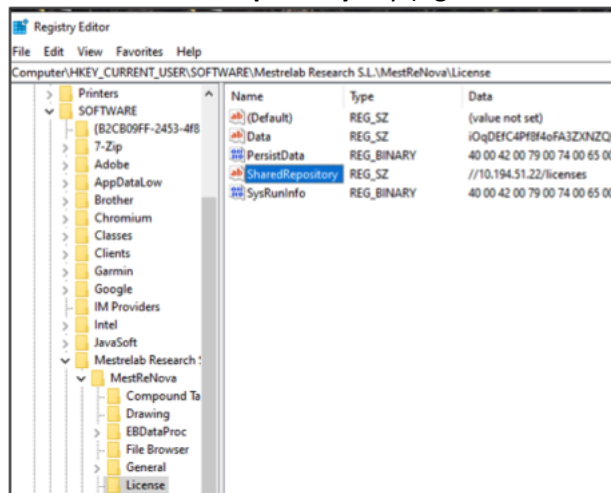

- Open the “Registry Editor” (type “regedit” in the search bar)

- in the tree at the left, go inside: [HKEY_CURRENT_USER\SOFTWARE\Mestrelab Research S.L\MestReNova\License]

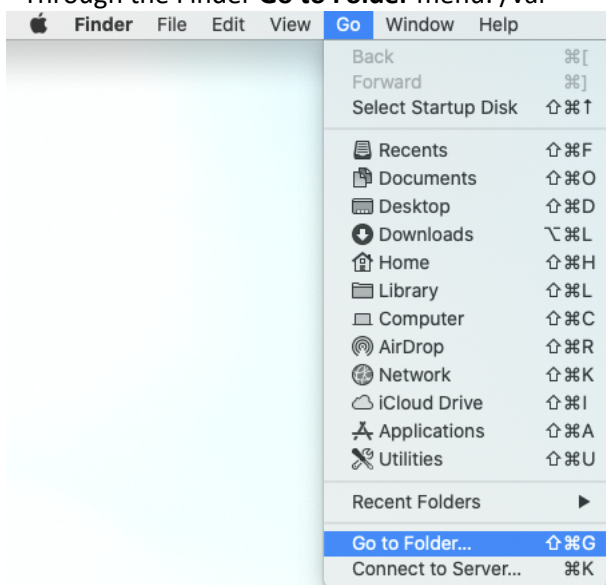

- Find the **SharedRepository** key (right side of the window) and right click to delete it.

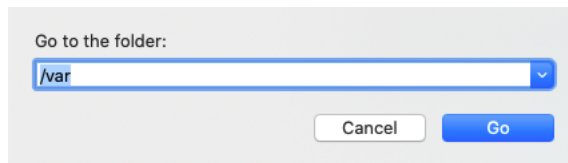

c. if your path starts with /var/MNLicenses/... (MacOS)

- Through the Finder **Go to Folder** menu: /var

- Click on Go

- Inside the **MNLicenses** folder, delete all existing license files:
